2008	A unique wooden parts impregnation technology released. Windows for passive houses produced. Soundproof windows designed, developed and produced first.	2021	In 2021 we started manufacturing fireproof opening inward and outward opening windows.
2009	Exclusive gold-coated windows designed for Russia, Kazakhstan and Arab countries.	2022	30th Anniversary.
		2023	The Doleta M10 SLIM is the cornerstone of the Doleta M10 system upgrade with even better characteristics and design.

DOLETA WINDOWS EVOLUTIONS

Doleta LTD is one of the most modern and innovative windows and doors manufacturer both in Lithuania and Europe and is highly acknowledged for its wood and wood-aluminum windows, doors, facades, winter conservatories.

Since 1953 Doleta products have reached different parts of the world, from east: Japan, Kazakhstan, Ukraine to west: Austria, Germany, England, Ireland, the USA; from south: Spain, France, Italy to north: Norway, Denmark, Greenland and many others.

Cooperation with architects and partners from different countries, constantly determine the demand of non-standard products and solutions. A team of over 20 constructors have designed and developed 35 different windows/doors constructions, which explains why the company is the most innovative window manufacturer and window fashion developer.

We export over 3 quarters of our production.

At the end of 2007 an extension to the factory with high-end machinery and equipment was opened. Having 20000 m² of industrial area and over 176 workers, the company is able to produce 10000 m² of windows and doors per month.

With the extension to the factory in 2007 a new and so far unique automatic impregnation and drying equipment was launched where individual window parts are separately soaked twice with ecological materials, dried automatically and then assembled. Following the automatic impregnation, they go to a painting line where they are coated with three layers of ecological paint. This process ensures better wood and color protection, durability and longevity. What is more the surface reached “furniture” like quality.

Doleta is well known as a manufacturer and developer of non-standard products. The greatest attention is given to technical characteristics of the product, as well as warranty and post-warranty service and the relations with the clients.

Applications of modern technologies, components and finishing materials of leading manufacturers, allow the company to win the top quality of its products.

Windows and doors are an expression of each person's individual lifestyle. There are a lot of window manufactures to choose from but only few can guarantee a unique product with its durability, longevity and energy efficiency. Doleta develops, manufactures and improves its products, which meet a diverse range of needs and demands and have the top quality. The company has an exclusive unit of specialists, including art, design, security, and construction who work hard to meet the highest requirements of customers.

Wood is one of the oldest materials on Earth and the fact that it has passed the test of time for thousands of years is evident proof of its unparalleled advantages. Wood stands out from other building materials for its best value insulation, durability and beauty. Due to its unique suitability for processing, this natural material may be manufactured of any shape. As a renewable raw material, wood also fully complies with modern environmental protection and combat against climate change. All the company's products are eco-friendly.

Doleta's windows and doors, made from numerous kinds of wood, are warm, feel smooth and look aesthetic from both - inside and outside. Harsh weather-proof elements and different configurations of aluminum profiles from outside also make its product really special, unique as well as functional.

In 2014 renovated aluminium windows, doors, and facades manufacturing facilities open unlimited possibilities for the most demanding projects.

DOLETA M10 SLIM

The Doleta M10 SLIM windows and sliding doors system upgrade with even better desing features and performance.

- Thinner frame: - 30%
- Larger area of the glass unit: + 28%
- Higher U_w value $W/(m^2K)$: - 12.5%

We are the world leader in designing and producing highly exclusive

- windows
- doors
- lifts / slide doors
- curtain wall

made of wood, wood-clad aluminum, and wood-clad glass.

THE MOST POPULAR TYPES OF UNIQUE (SOLUTIONS) WINDOWS PROFILES

Doleta M10 SLIM ▶

- Cross-sectional height only – 88 mm.
- Glass panel thickness – 28/52 mm.
- Various forms of internal decoration are possible
- Approved by Passive House Institute
- Uw up to 0.70 W/m²K

◀ **Doleta M10 SLIM LINE**

- Cross-sectional height only – 88 mm.
- Glass panel thickness - 28/52 mm.
- Various forms of internal decoration are possible
- Uw up to 0.70 W/m²K

Doleta M10 SLIM Sliding door ▶

- Interlocking cross-sectional width only – 54 mm.
- Plane surface from outside and inside
- Different variations of wooden profile edge
- Uw value 0.7 W/m²K

THE MOST POPULAR TYPES OF WOODEN WINDOWS PROFILES

Doleta M10 ▶

- Cross-sectional height only – 126 mm.
- Glass panel thickness – 28/52 mm.
- Various forms of internal decoration are possible
- U_w up to 0.77 W/m²K

◀ **Doleta Modern EI60 Fireproof**

- Cross-sectional height only – 126 mm.
- Resistance to fire EI60/EW60 classes
- Acoustic value up to 46 dB
- U_w up to 0.80 W/m²K

Doleta SCANDINAVIA ▶

- Cross-sectional height only – 89 mm.
- Glass panel thickness – 24/46 mm.
- Various forms of internal decoration are possible
- U_w up to 0.79 W/m²K

SPECIFIC SOLUTIONS FOR UNIQUE SITUATIONS

Doleta STEEL ▶

- Slim, strength and flexible profiles
- Available in arch and other geometric shapes
- Various type of finishes are possible: RAL, Cor-Ten
- Uw up to 1.04 W/m²K

◀ Doleta RETRO

- Various forms of internal decoration are possible
- Thickness of wooden profiles – 78/98 mm.
- Glass panel thickness – 28/52 mm.
- Uw up to 0.77 W/m²K

Doleta SASH ▶

- Frame thickness - 155 mm.
- Sash - 50 mm. thick profiles
- Units inside sash - 24 mm. thick
- Uw up to 1.6 W/m²K

THE MOST POPULAR TYPES OF ALUMINIUM WINDOWS PROFILES

Aluminium Masterline 8Hi ▶

- Cross-sectional height only – 119 mm.
- Glass panel thickness up to 28/52 mm.
- Uw up to 0,8 W/m²K

◀ Aluminium Slimline 38

- Cross-sectional width only – 72 mm.
- Glass panel thickness up to 28/52 mm.
- Uw up to 1.0 W/m²K

Corvision Plus Slim Sliding system ▶

- Interlocking cross-sectional height only – 25 mm.
- Glass panel thickness - 52 mm.
- Uw up to 0.9 W/m²K
