

An abstract line drawing in white on a dark background, consisting of numerous vertical lines of varying heights and thicknesses, creating a sense of depth and perspective, resembling a stylized window frame or a series of panes.

**DOLETA.
FRAME THE WORLD
YOU LOVE.**

Your windows frame more than a view. They frame the moments and the life you cherish. That's why we craft each one to fit your world perfectly.

The world you love deserves the perfect frame.

DOLETA HISTORY

For over three decades we've been framing the unique and beautiful worlds of our clients. From Japan and the UAE to the USA, from Italy to Scandinavia – every country, every home and every client brings a story waiting to be framed. Your uniqueness inspires us to innovate, pushing us to create solutions never seen before.

Because no two views are the same – and neither are the frames that shape them.

Wood is one of the oldest materials on Earth and the fact that it has passed the test of time for thousands of years is evident proof of its unparalleled advantages. Wood stands out from other building materials for its best value insulation, durability and beauty. Due to its unique suitability for processing, this natural material may be manufactured of any shape. As a renewable raw material, wood also fully complies with modern environmental protection and combat against climate change. All the company's products are eco-friendly.

Applications of modern technologies, components and finishing materials of leading manufacturers, allow the company to win the top quality of its products.

Windows and doors are an expression of each person's individual lifestyle. There are a lot of window manufactures to choose from but only few can guarantee a unique product with its durability, longevity and energy efficiency. Doleta develops, manufactures and improves its products, which meet a diverse range of needs and demands and have the top quality. The company has an exclusive unit of specialists, including art, design, security, and construction who work hard to meet the highest requirements of customers.

Doleta is well known as a manufacturer and developer of non-standard products. The greatest attention is given to technical characteristics of the product, as well as warranty and post-warranty service and the relations with the clients.

Doleta's windows and doors, made from numerous kinds of wood, are warm, feel smooth and look aesthetic from both - inside and outside. Harsh weather-proof elements and different configurations of aluminum profiles from outside also make its product really special, unique as well as functional. In 2014 renovated aluminium windows, doors, and facades manufacturing facilities open unlimited possibilities for the most demanding projects.

Front doors – where security meets style

Your front door is more than just an entryway, it's the first impression, a statement of style, and a symbol of security. Built to last and designed to captivate, our doors blend reliability with distinctive aesthetics, adding character to any home. Let your entrance reflect your individuality.
